FIRST & LAST NAME

name@fake.com · 555.555.5555

javascript · html · css · angularjs · node.js · angular · postgresql · git

PROJECTS

► Business Name Tracker | currently used by a business

AngularJS + HTML + CSS + Node.js + PostgreSQL + Socket.io

Allows instructors and other high-level employees at DevMountain to track various stats, including the average health of their help queue and the students who were helped the most in a given timeframe.

► Fake Management Solutions | done in Angular with only one week of prior instruction

PostgreSQL + Angular + Node.js

With FMS, companies can sort their employees into teams, add new users, and grant permissions to employees based on their teams.
